

Interested in learning how to keep your septic system functioning properly?

Attend the Homeowner Maintenance of Systems Course for Free!

This course provides a basic understanding of the operational and maintenance activities of a conventional septic system, and explains how activities within the home impact septic systems. Presentations will cover the treatment processes, health and safety considerations, how to inspect, and maintain the system. This course also provides answers to the most frequently asked septic system questions, including when to pumpout a tank and what can or cannot go down the drain.

Course Information:

TUESDAY, SEPTEMBER 17, 2013. 6:00PM - 8:00PM

Lampasas County Farm Bureau Building
1793 US HWY 281, Lampasas, Texas
Please Pre-Register to: 254-774-6008

Cost: Free!

Why Should You Attend?

Septic systems are not flush and forget systems! Therefore maintenance is essential to ensure proper function and longevity of your septic system. Attendees will gain a better understanding of how to maintain their septic system to protect the health of their family and the environment. More information is available at <http://ossf.tamu.edu/>.

This is made possible by funding through the Clean Water Act Section 319(h) dollars provided through the Texas State Soil and Water Conservation Board (TSSWCB).

This program is a part of the Lampasas River Watershed Protection Plan, developed by the Lampasas River Watershed Partnership, a collaborative effort by local stakeholders, Texas A&M AgriLife Research, and Texas State Soil and Water Conservation Board to address water quality concerns within the Lampasas River watershed. The Lampasas River watershed encompasses parts of Mills, Hamilton, Lampasas, Coryell, Burnet, Bell and Williamson Counties.
