# Lampasas River Watershed Partnership Newsletter

July 2015

---

Lampasas River Partners,

I hope this newsletter finds you well as we enter the dog days of summer! We've got a great program coming to the watershed at the end of the month. I've included information below, as well as a copy of the flyer and agenda for the workshop.

## **Lone Star Healthy Streams Workshop**

The Lone Star Healthy Streams workshop will be held on July 29<sup>th</sup> at the Copperas Cove Independent School District Board Room, 703 W. Ave. D in Copperas Cove. The workshop will begin at 10 a.m. and end by 3 p.m. A catered lunch will be provided at no cost, but an RSVP is requested by July 27. The Lone Star Healthy Streams program aims to educate Texas livestock producers and landowners on how to best protect Texas waterways from bacterial contamination associated with livestock production and feral hogs. By participating in this workshop, livestock producers and landowners can learn specific conservation practices that can help combat bacteria pollution and improve and protect the quality of Texas water bodies, specifically the Lampasas River and its tributaries.

Three Texas Department of Agriculture general continuing education credits will be provided for certified pesticide applicators.

To RSVP for the workshop, go to <http://lshs.tamu.edu/workshops/> or call Matt Brown, Texas A&M AgriLife Extension Service program specialist in College Station at 979-862-8072.

***Please feel free to share this information with your neighbors and anyone you think might be interested in these programs.*** As always, please call me at 254.774.6008 or email [lprcin@brc.tamus.edu](mailto:lprcin@brc.tamus.edu) if you have any questions.

Sincerely,  
Lisa Prcin  
Lampasas River Watershed Coordinator
